15 September 2017

15th September 2017

To whom it may concern,

Texuna are currently conducting the following tests and services on the DappDapp application:

- penetration testing
- performance testing
- scalability recommendations
- blockchain and Initial Coin Offering consulting and support

Subject to the successful outcome of our findings Texuna will introduce DappDapp to a large scale platform with over 10 million registered users with a view to facilitating a commercial agreement between the parties. Should any negotiations be successful Texuna will also provide technical support on any integration challenges between the parties.

Should you have further questions please don't hesitate to contact me.

Thank you,

Patrick Lynch
