

## **UPDATE - MARCH 10, 2019**

DashBoost aims to allow smaller proposals to have a place in the Dash treasury system. Please read the [DashBoost Proposal](#) and the [DashBoost Technical Specification](#) to learn more about the project as a whole.

This update will consist of the following:

1. Features: New Features are added in the admin panel.
2. Bug Fix: Existing and new bugs fixed.
3. Updates: Few updates to enhance the DashBoost project.

## **FEATURES**

- ❖ “Draft Proposals tab” in the Admin Panel to list all draft proposals.
  - “Submit Draft Proposals button” will do stamping on chain and broadcasting the proposal to the network if the proposal owner encounters an issue after paying the fee.
- ❖ Random end time feature added which stores random end time for every new cycle created from now on and submission and voting deadlines are based on that.
- ❖ Random end time transaction will be visible to users once the cycle ends, for audit and verification purposes.

## **BUG FIX**

- ❖ Login issue when users enters wrong password in testnet server is fixed.
- ❖ Number of Proposals to be funded are hidden from the user until the cycle ends.
- ❖ Comment duplication fixed.

## UPDATES

- ❖ ReadMe file updated.
- ❖ Submission and voting deadlines display date format has been changed to d-M-y.
- ❖ Users now have to ability to update their passwords on My Account page.
- ❖ Text updated on Register and Edit Proposal pages.
- ❖ Proposals UI updated to show DashBoost funding stats:
  - DashBoost statistics will be displayed including top five proposals that has secured maximum votes since DashBoost launch.
  - The total dash allocated to proposals on the DashBoost platform.
  - Total number of proposals submitted.
  - Total number of proposals funded.
  - Total number of proposal cycles.
- ❖ Date submitted has been added to Proposals in list view.
- ❖ Category filter has been added to Micro Proposals page “Sort Button”.
- ❖ A number of DashBoost email templates has text changes.
- ❖ Contact Us link added to footer.
- ❖ Listed proposals in chronological order on the ‘My submitted Proposals’ tab and also added the number of comments on each proposal.
- ❖ Transaction id shown on the verification modal is linked to dashboost block explorer
- ❖ Create proposal button will be visible all the time so users can create draft proposals even when the cycle is not active.
- ❖ Copy to Clipboard button added to proposal and donation modals to copy the address while submitting the payment.
- ❖ Added more validation in cycle creation. Only one cycle at a time can be created and does not allow to select past days.
- ❖ Wallets with zero balance are removed from the list. All wallets will be displayed using filter option “All”

From Marty

- All 4 AWS DashBoost servers have been fully patched with the latest security updates.
- DashBoost test servers have been upgraded to run Ubuntu 18.04 LTS with the plan of completing the upgrade on the live servers on the next phase of DB development.
- ExPUB key change on the mainnet DashBoost server for proposal and donation payments.
