

## Setting Up DASH for your Business

1. First, you need to **install a DASH wallet**.

a) For home computer: [www.dash.org/wallet/how-to-install-the-wallet/](http://www.dash.org/wallet/how-to-install-the-wallet/)

b) When you've synced with the network & encrypted your wallet, next step.

2. Now, let's **create a QR code** for your merchandise. This will allow your customers (online and in person) to scan the code and instantly, and privately, send you money.

a) In your DASH wallet, click on "receive"

b) Your label tells you what product your customer bought. Let's make one called "Leather Boots".

(Note: You can use this box to track SKU of merchandise, too. If you use an SKU for each product here, you can tell how many of an item you sold.)

Use this form to request payments. All fields are **optional**.

Label:	Leather Boots
--------	---------------

3) Let's **sell our Leather Boots for \$20**. How do we know how many Dash that is? Open a web browser and go to: <http://coingain.com/price/dash/cad>. Click the “swap” button to convert Canadian dollars to Dash. Type in \$20, and press update.

Canadian Dollar (CAD)	<input type="text" value="20"/>	<input type="text" value="3.12"/>	Dash (DASH)
<div>Update</div>			
<div>⇌ Swap ⇌</div>			

4) We now know that \$20 CAD equals 3.12 Dash. We **enter that amount into the Dash Wallet**.

Label:	Leather Boots		
Amount:	<input type="text" value="3.12000000"/>	<input type="text" value="DASH"/>	
Message:	<input type="text"/>		

5) **The “Message” box is optional**, but we can just put, “Thank you for shopping at our store!”

Note: If you're shipping a physical product, you should include your business email address here, so that your customers can send you their shipping details.

Label:	Leather Boots		
Amount:	<input type="text" value="3.12000000"/>	<input type="text" value="DASH"/>	
Message:	Thank you for shopping at our store!		

6. Now **let's generate our QR code** by pressing “Request Payment”

Message: Thank you for shopping at our store!

☐ Reuse an existing receiving address (not recommended)

[Request payment](#) [Clear](#)

7. We have our QR product code! Now we just have to **print the QR code**, and place it on our product! Click on “Save Image...” and save it to your computer.

Request payment to Leather Boots ? X

**Payment information**  
**URI:** <dash:XbW4fJLg1Go8PDE3MGUj3BbBca9W4u6pT2?amount=3.12000000&label=Leather%20Boots&message=Thank%20you%20for%20shopping%20at%20our%20store%21>  
**Address:** XbW4fJLg1Go8PDE3MGUj3BbBca9W4u6pT2  
**Amount:** 3.12000000 DASH  
**Label:** Leather Boots  
**Message:** Thank you for shopping at our store!

[Copy URI](#) [Copy Address](#) [Save Image...](#) [Close](#)

8. Once printed, you can **place the QR code on your product or stand**, or place the QR code on your website for online products. You can even create your own “donate” or “tips” button this way.

9. **Now your customers can purchase your goods** with their Dash wallet App.

They will simply scan your products (on the computer screen, or in-person) and pay for them anonymously & instantly from anywhere in the world!
